

About Us

Here at JG Innovations Inc., we're real people with real solutions for your concealment needs. As a marketplace leader in the interior steel soffit products, we possess the expertise required to efficiently handle your unique piping and mechanical enclosure specifications. Beginning with free design aid and competitive budgetary quotes, JG Innovations delivers the commitment necessary to take your next project from conception to completion. Our clients can expect to receive the quality-fabricated and powder coated, interior soffit system required to get the job done right and on time.

Staffed with licensed, professional engineers and skilled tradesmen, JG Innovations is also a reliable partner you can trust for your speciality engineered fabrications. Provided with a copy of your shop drawings, we guarantee nothing less than precision craftsmanship in a timely manner. We are a detailed-oriented company equipped with the resources to handle even the most complex of architectural products. From column wrapping to escalator panels, JG Innovations' extensive experience with sheet metal and aluminum provides the solutions your job requires. Please contact our sales team toll-free at **1-888-933-2248** or email sales@JGIUS.com for further information.

Choose JG Innovations as the fabrication source for your next project. We go to work for you....

Design

Architectural Soffits

"Your Mechanicals. Our Quality. Shared Vision."

Why lose the fundamentals of 'Design' while implementing practicality? JG Innovations Inc. understands that certain projects are based on employing modern interior elements without sacrificing functionality. Our 'Design' Architectural Soffits were created specifically for these types of applications, keeping you 'up-to-date' with current, interior design trends.

Our 'Design' line goes beyond providing a classic-looking, minimal-hassle interior soffit system. The dual nature of our architectural soffits not only conceals any exposed combination of Fire Sprinkler, Plumbing and Hydronic piping, HVAC or Electrical systems but also does so in a creative, stylish manner unlike any other interior soffit solution offered in today's market.

We offer a vast array of specialty surface finishes on stainless steel and other metals. Dependent upon the specifics of your project, your 'Design' options may include:

Finishes

- Polished Finishes
- ColourTex[®] Stainless Steel
- Super Mirror High Polished Stainless Steel

Silhouettes

- Bow-Shield
- Soft Edge-Shield
- Crown Molding-Shield

...as well as your custom design ideas!

If designer metals are a touch beyond your decorative needs, we also offer our 'Design' Architectural Soffits with unique veined, wrinkled and sandstone textures in multiple colors that eliminate a white, 'humdrum finish'.

The custom features of our 'Design' Architectural Soffit line doesn't merely begin and end with trendy, aesthetic options. All of our two and three-sided soffit systems are 100% custom-sized to order. Simply provide the dimensions of the mechanical systems being enclosed, and voila! An attractive and well-fitted, modern interior soffit system will arrive within 3-4 weeks nationwide; making both you and your facility look good!

Are you a trend-setter looking to implement 'Design'? Please contact our sales department at, **1-888-933-2248** or email sales@JGIUS.com for further information.
